WATER REPORT

Tanks are all still full as of this date and with cooperation from all members by using water in a prudent manner we should have little or no difficulty providing water to everyone this season. We were blessed with a late abnormal snowfall and this should keep the springs going good until the summer rains recharge them again. Remember that water is for human consumption and household use only and any watering of trees, washing of cars is not permitted. If any violations are found appropriate action will be taken for the offender.
