Mt. Lemmon Echoes

Serving the Homeowners of Mt. Lemmon

Happy Thanksgiving 1999 - Next Edition of Echoes In 2000

AZ State TAX CREDIT Form on Cover for Z.E.S.

By Chuck Autrey

Along with your Echoes this month you will receive a tax credit form for the Mt. Lemmon Zimmerman Elementary School. If you complete the form, attach a check for up to \$200 and mail to the indicated address before the end of the year you can deduct 100% of the amount of the check from your 1999 Arizona State income taxes. This will get some of your state tax dollars directly to the Mt. Lemmon school without the usual government haircut.

I recommend that you select extracurricular activities and not designate a specific activity. That way the teacher can use the funds for the activities she thinks will be most beneficial to the students. Don't delay, it must be received at Pima County School District office by December 31, 1999 or the state tax credit won't apply to this year.

Road Construction Schedule on Tear- Off Page

The Contractor for the Road Project is selected in December. Minor construction activities begin in January 2000. Don't be surprised if you are following a

pilot car in January with 15 minute delays. Road closures start in February on Tuesdays and Thursdays. Contacts are Kaneen Advertising and Public Relations, Joan Beckim (885-9009) and Rick Kaneen. Federal Highway Administrators are Kevin Thorton and Mark Taylor (no phone numbers given out). Debbie Hardesty reported that a conversation with Joan last week revealed that construction on the lower section only of the road may be delayed by a few months because of owl activity. Several of the local businesses are planning to close on Tuesdays, Wednesdays and Thursdays during the construction schedule that calls for full daytime road closures, so call ahead to confirm which businesses are open. Those same businesses also said they would keep later hours over the weekends.

Ski Valley For The Holidays

by Jay Davies

Mt. Lemmon Ski Valley will be serving the Traditional Thanksgiving Dinner on Thursday from 12 noon until 5 PM. Turkey with all the trimmings or ham with scalloped potatoes will be served along with Suzannes' home made pumpkin pie. Join us! Reservations are advised. 576-1321.

Don't forget the **Motherlode** for your Christmas shopping. We've got all the warm stuff - long underwear, turtlenecks, fleece, gloves, hats, etc. - as well as some great gift ideas. Like every winter- **THINK SNOW!** Actually, think it a little harder than last year. O.K.?

The Iron Door will be open Christmas day, New Years Eve and New Years day until 5 PM.

The Alpine will be serving its Traditional Thanksgiving Buffet @ 1 PM and 3 PM. RSVP 576-1544. The Alpine will be closed on Christmas day and has been reserved by a private party on New Years Eve.

**PLEASE SUPPORT
ALL YOUR LOCAL
BUSINESSES**

Mt. Lemmon TRICO GENERATOR Story

by Barb Ziemann

Rural electric cooperatives like Trico have a proud history of bringing electricity to remote areas. However, maintaining power quality in areas where lines run through rugged terrain and are battered by winter storms is challenging. Trico is stepping up to meet this challenge on Mt. Lemmon by installing 1500 KW rated diesel engine backup generator.

The site is located near the fire station at the Catalina Highway

and the Mt. Lemmon Control Road. Our work at the site has begun with completion of a new building to house the unit scheduled near the end of November. We hope to have the generator delivered to the site the 1st week of December and to have it available for use by the end of this year.

The generator will enable Trico to utilize its power supply for the Mt. Lemmon area if outages are realized on our existing power lines. Although some areas will still be affected by longer outages because of their location, this unit will be able to provide backup to the vulnerable west slope Trico lines that feed the mountain.

Check The TRICO Livewire for updates. Trico is Y2K ready! Quotes from the Livewire:

"Since the energy source on Mt Lemmon is inaccessible to line trucks and it would be quite costly to totally reconstruct the lines ... the generator would be used to feed power to Mt. Lemmon when trees break the line or when the ice storms cause damage to the line. It could also be used when it is necessary to repair or perform maintenance on parts of the line; essentially becoming the electrical backup for the mountain."

Trico phone # 744-2944
website: www.trico.org

NET LINKS & Information ... Y2K & the Millennium

by Darrell Hayhurst III

There is a great deal of myth and misconception about Y2K and what it means. First off, Y2K has nothing to do with the millennium. The millennium

takes effect January first, 2001. Y2K takes effect January first, 2000. So what exactly is the dreaded Y2K bug that has so many people nervous?

Many computers and other transactions keep track of the date with a simple mm/dd/yy formula, one that has been in use for a good forty to fifty years. All the driver's licenses, credit cards, and most of the other forms you use have this same method of keeping the date, which is good. Except for that pesky /yy part. Only two digits keep track of year, so what happens when you go from 99 to 100? That question is what the Y2K bug is all about.

Some people think it is going to be the end of the world as we know it, with massive power outages everywhere and planes falling out of the sky. Some people are weirdos. But

this is not to say that Y2K is insignificant. On the contrary, it might prove quite inconvenient.

For example, Windows 3.1 is not Y2K compliant. That

means some of the operations it performs will have errors due to the date being incorrect. And it isn't just older software that can have problems. Microsoft Internet Explorer 4.01 is not Y2K compliant either, so if you have been putting off upgrading to 5.0, think again! Not being Y2K compliant doesn't mean the program will simply stop working at midnight, or that the computer will go on a murderous rampage across the country side, but some functions just won't work. If you are curious about what programs on your computer are Y2K compliant, you can find out.

AOL users can use keyword Y2K BUG, and Internet users can go to WWW.CNET.COM and click the 'Y2K' link along the top. Both lead to a wealth of information on the bug and how it may effect all different sectors of the economy. Are you ready for Y2K?

NFH Free Forum February 5th, 2000

Best Western Airport Hotel
12:30 PM FREE

In case you missed this in your last issue - please mark your calendars now! The National Forest Homeowners (NFH) will hold an open meeting in Tucson, February 5, 2000. The NFH is the only nationwide organization solely advocating for those with second homes on the national forests. Registration for the forum, which will be held at the Best Western Airport Hotel, will begin at 12:30 PM. A full afternoon of educational /informational programs is planned. These will include discussions of the appraisal process, the recreation residence permit and policy, and the latest on legislation affecting permit fees.

As The Lemmon

TWISTS

B.J. came, took portraits, and took the film back to San Francisco with her for development.

Cathy Brown will receive the film from B.J., so, all you parents of school kids, hang in there - Cathy will phone you when she gets the film from B.J.

Jean & Leroy Day have a small loader they bought for snow removal. Since we're all thinking snow, but no one wants to think shoveling driveways, keep them in mind if you need some snow

removal 576-1614. I asked them if they had a name for their prospective enterprise. Like most newlyweds, they couldn't agree, except to say, just call it Jean & Leroy's. Jean insisted her name take top billing as she usually gets to run the machine & Leroy gets to put on the chains & change the tires.

Linda Mulay sends a big **THANK YOU** to everyone who sent cards and flowers after her recent surgery. She said it really cheered her to receive them. Everyone is glad the quadruple bypass went well for Linda - she is an active member of the community and everyone is glad she'll be back on the Lemmon again soon.

If you really want to keep a secret, trust it to Gary Tenen, one of the 2 discoverers of the caves at Kartchner Caverns. Gary is a cabin owner on Mt Lemmon. When you visit Kartchner Caverns, thank your neighbor for it's discovery!

MLWC members - please take a moment, right now, if you haven't already done so, to RSVP one way or the other, if you are coming to the Brunch December 4th at Judy Epstein's.

Mark your calendars now for the Annual Homeowner's Dinner April 18th. This time we'll be trying out the Hidden Valley Inn for dinner - and we'll try something different during the meeting. Stay tuned -

Thanks for the Memories- 1999 Halloween Bash

Like the 4 amigos of Halloween witchcraft, these ladies put on a Halloween bash that was a a smash! Joanne Eader, Malisa

Grantham, Dani Hayhurst and Patty Thomas collected over \$1600 in raffle prizes, and organized & stirred the giant cauldron that steamed into the Halloween Bash '99 festivities. Patty Thomas supplied a plethora of ideas and props and everyone joined in to the fun! There were some contributors to the raffle that came in after the printing of the October Echoes, and we'd like to take the time to thank them now. Sonni Wendt, 3 certificates for 1 night's stay each (value \$117/night) at Mt Lemmon Suites and Fine Crafts, Karen Shunk, Certificate for Palm Reading (\$40 value), Target Stores - \$25 Gift Card, William "Bill" Shirley, \$50 cash, and Dennis & Maggie Cozzetti, 2 Certificates of \$50 each to the Olive Garden.

Thanks to Gerry & Eden Hackney for loan of the gypsy tent frame, Pat Hayhurst for technical advise on setup, the Chef from Hell, Helen "Bone-a-Part" Quigley, the food table manager and preparer of the party trays, Deputy John Eader for brute strength whenever needed, Jim Grantham, who willing filled in when Malisa was sick 3 days before the Bash (and that included Jim helping Joanne Eader make 14 of the cakes given at the cake walk), Mike Stanley for doing a stand-up job as Elvis (Elvis never left the room or sat down the whole night & was the best!) and the 3 firefighters Steve Swarts, Chris Massingill and Kelly Shanahan who set up and scared the folks with the haunted house! Raffle Ticket Drawer was handled by Janet Creeden, with front Table Ticket Sales by Ron and Dorothy Deschalit. Dorothy and Rachel Crawford and Jim Grantham walked you all through the cakewalk (and thanks to all you who made the

cakes). Reel thanks to movie projectionist Pat Hayhurst, with ushers Kathy and Rod Shields. Thanks to magician, Mike Deschalit. In case you hadn't guessed, the Gypsies were Dani Hayhurst, Jeanne Hartman, Karen Shunk & the Madame in the tent still prefers to remain anonymous.

Hot Body Parts game was operated by Wendy Carlson and Dan Green with loads of Lisa Frank stickers & stuff being given to the kids. Popcorn popped by Marge & Red Greth & family. The Greths also had wwwwaayyyy to much fun blowing up and handing out those helium filled balloons to everyone! Face painting makeup was donated by Kathy Early, Ice was donated by Alpine and the Coffee House, and Mike Searle donated at least 5 cases of soda.

The Cotton candy maker with the pink arms was Tom Thomas. Decorating prior to the bash was done by the Rosano girls, Karen Shunk (window paintings and signs), Valerie and Stephanie Peterman, the Shirley girls, Dorothy and Rachel Crawford, the firefighters on duty that day, Jim Grantham, Pat and Dani Hayhurst, Patty Thomas, Joanne Eader, Jasmine & others.... and Rick Creeden hauled the garbage away for us the next day. We're getting low on memory now, so if we missed your name, you're in our hearts for all the support you gave that night!

We can't thank you all by name, because some of you donated \$860.50 in cash at the doors, but over \$1785 was made for the fire department that night and you all are to thank. We weren't in the building for more than 20 minutes and we had to open 2 of the bay doors to handle to overflow of people.

Special Thanks to donators Mary Lou & William Piatkiewicz \$300.00, Patty & Tom Thomas \$105.00, Sally McGreevy \$65.00, Pat & Dani Hayhurst \$110.00, David Johnson \$20.00, Karen Shunk \$20.00, Joe & Florence Wilhoite \$50.00, Ross & Dianne Purcell \$40.00, John & Joanne Eader \$15.00, Alan & Wendy Lawson \$25.00, Jean Grantham \$15.00, Debbie & Ed Hardesty \$10.00, Pam & Matt Harmon \$40.00, Janelle & Marty Miranda \$10.00, Wallace & Beth Platt \$10.00, Robert & Victoria Jedicke \$25.00, Phil & Carol Mack \$20.00, Kurt & Catherine Rienke \$20.00, and Maggie & Dennis Cozzetti \$25.00. *Read on if you'd like to know how your donated dollars and tax dollars are being spent by the Fire District!*

Fire Dept News

THIS PAST YEAR - 1999

By Chief John Roads

1999 has been a busy year at the station for projects. As far as emergency calls go, it may be the slowest year of the decade. As of 11-15, there have only been 129 calls. In 1995, there were 299 calls for the year. The slowest total year previously on record is 155 calls. Only December 31st will tell for sure. For the first time in this administration, MLFD went 12 months with no full-time firefighter turnover. However, this changed at the 12-month mark (October) as Mitch Avelar left the mountain. Turnover has typically been 200% per year.

The water storage trailer, at Loma Linda Extension and Florence, was damaged by an anonymous hit and run vehicle. It has been repaired. Plans are in the works to move the trailer to a new location. The installation of Hydrants on Tempe and Loma Linda Extension eliminated the need for the trailer at

this location.

The second floor storage area at the back of the station has been completed. This shelved area now has organized storage.

The upstairs area is almost complete. The area has been converted to a heated training and Fire Board meeting room.

The old Palisades fuel tanks were relocated to the area near the County Highway building. MLFD, Water Coop, Sheriff's, USFS crews and highway department vehicles now share the fuel system.

New Apparatus Building - Called Station 2, was built. This will eliminate having the three rescue vehicles sitting out in the snow and freezing weather. Construction started in February. The building was completed in October.

A second compressed air foam pumper system was added to the 1-ton rescue firefighting truck. We now have two foam fire fighting capable engines.

A Mass Casualty Incident trailer was constructed. This allows the department to keep all extra rescue equipment ready for a major medical incident. In the past, extra gear was stored anywhere we found space for it. If it were needed, it would take time to collect it. The trailer is designed to start work on a 30-casualty incident.

A second computer was purchased for administration purposes. This acts as a back up for all business work. It also gives the firefighters access to certain programs to enhance communications.

1999 generated the longest list of EMT's, Certified Structure Firefighters and Wildland carded firefighters. Unfortunately, the highway construction and normal turnover will reduce the available personnel in the near future.

Three MLFD personnel and one engine responded to the Stanislaus Forest in central California to assist in 16 days of fighting forest fires. The crews gained valuable

experience and training, while the funds generated by the engine assisted in paying off the new building.

A new 4-wheel drive ambulance was purchased in late October to replace the two high maintenance van ambulances. The ambulance came from Edwards Air Force base in California and had prior service on Space Shuttle landings at Edwards. The unit will reduce the department's operating costs and provide adequate space for emergency equipment and multiple patients.

Future Projects include the following:

- * Redesign of the Communications System (Phones, Radio & Dispatch)
- * Implementation of a 24 hour dispatch system.
- * Connecting the Station to a Water System
- * Replacement of Older Pumpers
- * Return to Full-time Paramedic Service

Just a quick reminder - Make sure fireplace ashes are disposed of properly. Ashes dumped into the yard can cause pine needle fires that can burn back to the cabin. Also insure that all furnaces are properly serviced and ready for winter. And make sure that all smoke and carbon monoxide detectors are place and operating.

Water Co-op News & Updates

by Larry Waldron

Ladies and Gentlemen:

SUBJECT: STATUS OF WATER SYSTEM LINE, HYDRANT, AND TANK CONSTRUCTION

The primary purpose of this letter is to update the Summerhaven community on the progress made regarding our 6" transmission line, fire hydrants, and the 212,000-gallon tank installation. We also want to thank all members and associations for their support. Our 6" transmission line from the pump house, located in the village, to Loma

Linda Tank Farm is certified for use. The new fire hydrants are installed and operational and the new tank was erected this month. A low interest loan, wise board decisions, and extraordinary efforts by Ross Quigley and Michael Stanley have made for an under budget project. A significant decision, to seek approval for the purchase of heavy equipment in lieu of hiring contractors, has provided equipment for future construction and maintenance and reduced overall project cost. Since our old pump needs replacing, our efforts now turn to a new pump and pump house in upper Sabino to transfer water from the new tank to the Miner's Ridge Tank.

The secondary purpose is to announce a project that will monitor and control the water system in a reliable and efficient way. In doing so we are hopeful to reduce system outages related to the needed transfer of water between storage facilities. While the monitoring of the system itself will not prevent catastrophic system outages, it will notify personnel of a system emergency and will assist in troubleshooting. This benefit could save thousands of gallons of our water. The sooner a leak can be isolated, the less water is lost. Yearly records have shown our system experiences upwards of 32% water loss over the course of a year. This is high but is not unusual considering the mountainous terrain, old distribution lines and freezing conditions. A gallon saved is a gallon we can use. The water board has approved the purchase of a water monitoring system. An outgrown but reliable water monitoring system has become available. This system will be upgraded to provide computer based automated pump control, line flow metering, and system status. Emergency situations will cause a "voice page" to water and fire department personnel. A cooperative effort from the Fire Department has made this radio controlled system possible.

It is the boards primary objective to provide reliable water service while keeping future water rate increases to a minimum. Although we are not a charitable association, we encourage and welcome all donations. Previous individual and organization contributions have provided many system improvements. Since the monitoring systems was not included in this years budget, any financial support will help offset the \$15,000 system cost. We again thank you for the continued support as we endeavor to provide the community's water needs. If you would like more information regarding the water monitoring system or any other aspect of your water coop, please call me at 743-3034.

Respectfully yours, Larry Waldron
Water Board Member

"Lemmon-lite Nights" Summerhaven Summer of Lights 2000

here's an update of the plans as they are forming - forward to more input to Dani Hayhurst @ 298-6328 or e-mail hayhurstaz@aol.com or mail 100 N Avenida Javalina, T.A. 85748

Summerhaven Summer of Lights events for June & July - Lights displays at cabins & businesses over the Weekends of the Summer Lighting Contest

"Lemmon-lite Nights"

Categories for judging

- 1." Red White & Blue" - Celebrate America in the New Millennium
2. "Celebration to the Stars & Celestial lights" (i.e. Moon over Mt. Lemmon or Starry Starry Nights)
3. "Salute to Mother Nature" (like Flight of the Fire Flies, or a celebration to the Summer Solstice)

4. "Y2K" - creative use of lites - either by using 2000 lights, or illustrating the future - space themes, new millennium themes, etc.

Reminder:

Buy your light sets when on sale this season or save out your Christmas lights after the holidays - it's hard to find lights in May!

Uptown Saturday Nights:

Cool Nights and Lemmon-lites - where Santa goes in the Summertime to cool off when the ice breaks on the Santa Cruz! (slogan compliments of John Carroll)

Summerhaven Lemmon Lights events are being planned for June & July (rain starts interfering after the 4th of July). Besides helping out the businesses, this is also geared toward bringing the "Family" back to the mountain. We want everyone - grow ups and kids - to have some of the wonderful memories we all enjoy with a small town atmosphere.

The calendar plans are being penciled in :

June 3rd (Sat) LIGHT UP - the night when the cabins & business' all turn on their lights for the 1st time - we'll need to get a house count long before this night to find out how many we can count on to light up. Lighting up can mean just having a string of lights on the deck to an elaborate display compliments of a Winterhaven type light show! Ski Valley has lights in trees that will be lite in evenings over weekends and they are planning to keep later hours. (Most of the businesses I've talked to are planning to close Tues, Wed & Thurs & open Friday - Monday with later hrs on weekends)

June 10th (Sat) : Flying Saucers & Aliens night . You

can use your imagination here- we'll have the judging of the cabin light displays with awards and a party for all those who helped & participated!

June 17th (Sat) (Sunday is Father's Day): Cool Car night - have some car clubs display their cars, have 50's bobbi socks dances, hool-a-hoop contests, and Fun Races*, show movies like American Graffiti & Christine & have hot dog cook outs.

Have a cool car garaged that you'd like to show off?

June 24th (Sat) would be another turn on your lights night for everyone's enjoyment (also the MLWC TEA). Businesses can do all the activities they can creatively devise! All Lights would be on starting at twilight.

July 1st - & 2nd (Sat & Sun) American Pie weekend - lots of Blue Grass music (the truly American music) played to families sitting around on blankets, pie eating contests, (with ice cream, pop corn or snow cones as a possible fund raiser for the Water Co-op), gold panning exhibit, maybe a John Wayne look-a-like, all in preparation of the Y2000 4th of July Parade!

July 4th, 2000: (Tuesday) Parade @ high noon - Lets all come out & participate! We need to plan something special for the community later in the afternoon (businesses - got some ideas???), although the weather usually has rain in store for us from past experience - I published a photo a few years back with an Echoes article by Suzanne Hensel of the 4th of July community picnic in the early 1900s ...any ideas? More lights on at night for strollers.

July 8th (Sat) or July 15

Renaissance night - fairies, jugglers, pocket lady, strolling minstrels, carriage rides, kind of a street fair type atmosphere

We can plan this for either weekend if we get rain - otherwise, the rest of the summer is just weekends of lights & pleasant strolls along the lighted canyons. This is when we start getting more summer rains - but that doesn't mean the businesses can't plan events!

John Carroll suggested that the businesses create a drink called "Lemmon-lite" (based on lemonade, crushed ice & some other magical ingredients). We could have a quarter jar (25 cents a vote) at each business serving their version of the drink to decide which "Lemmon-lite" is the winning choice of the village, with all "votes" going toward the Fire department

Businesses open a little later could create dessert dishes of ice cream and give them interesting names geared for the special weekend activities & Mountain themes - aliens night could have milky way ice cream, big dipper & little dipper cones, cool cars night could be Big bopper ice cream, etc. Then even if the kitchens are shut down, revenue can still be made, and ice cream has a great "shelf life".

This is the time to give me feedback - you've all been very helpful to date - I like your positive input - we're working out the details - Next Update - the February issue of the Echoes

Mt Lemmon Audio Tour

Though some of the "frog" signs were stolen, most have been replaced for the audio tour. Public Land Interpretive Association (who operates the visitor centers at Sabino Cyn and Palisades) will be selling the tapes, and the tapes are also

available for check out with the Tucson-Pima public libraries.

The Echoes is the publication of the Mt. Lemmon Homeowners' Association for its membership. Membership dues are \$25 annually. Renters and Friends of the mountain may obtain an associated membership for \$20 a year. If you'd like to join, send your check with your mailing address to MLHO, PO Box 699, Mt. Lemmon, AZ, 85619.

Eight to nine issues of the Echoes come out from February thru November with updates on community events and information.

WHITETAIL GROUP USE AREA

Five group sites are being created for camping and picnicking at the Whitetail area. Each site will have a restroom, ramada, picnic tables, fire rings, and tent pads, and much of the area will be wheelchair accessible. This project will be completed by the winter of 2000. However, because Whitetail is in the Mexican spotted owl & Northern goshawk habitat, no construction can occur during spring and summer breeding & fledgling seasons, and winter snows also affect progress. Construction is funded by Congress - in other words, your tax dollars at work. SKY ISLAND SCENIC BYWAY LOGO is being designed by a local graphic artist to be used on signs, brochures and other printed materials and is being paid for by the user fees collected.
